

jLAN Technologies Announces full support for Microsoft SQL Server 2008

Hollywood, Florida November 25, 2008. jLAN Technologies, a leading Microsoft Gold Certified partner in mobility solutions , announced this month full compatibility for Microsoft SQL Server 2008 working with jLAN Mobile v. 2.8.

“This is another major milestone for jLAN Technologies, which continues to stay at the forefront of technology,” said Andy Link President, jLAN Technologies, Inc “Our mission is to seamlessly integrate Windows Mobile devices to back office systems with our jLAN Mobile Sales suite. Our customers will greatly benefit by the enhanced scalability, performance and reliability SQL Server 2008 offers with regards to mobile database solutions.”

jLAN Mobile is used by companies throughout the world to connect mobile sales employees to back office ERP systems. “SQL Server is a core technology used by jLAN Mobile. It was obvious from our first set of tests that the performance of SQL 2008 has been greatly enhanced” said Jeff Woodard, CTO of jLAN Technologies. Woodard added, “Ultimately the performance and reliability enhancements will greatly improve the end user experience which is something we are constantly striving to achieve.”
